SMOKE DETECTORS

For Model L™ | Enlight™ | Emergence® | Xion™

Innovative 4-wire photoelectric duct smoke detector features a pivoting housing that fits both square and rectangular footprints and mounts to round or rectangular ductwork. Operates in airflow speeds of 100 to 4000 feet per minute, temperatures of -4°F to 158°F, and a humidity range of 0 to 95 percent (non-condensing). A plug-in sensor head offers improved false alarm immunity and simple installation, testing, and maintenance. Cover design isolates the sensor head from the low-flow feature for simple maintenance.

The housing provides ample wiring space, a 3/4-inch conduit knockout, and built-in short circuit protection to prevent damage to sensitive components during installation. High contrast terminal designations make wiring easy. With its 2:1 sensor-to-power capability, the power board may be used to monitor a second sensor, simultaneously (i.e., supply and return side). As many as 50 detectors can be interconnected. When one unit senses smoke, all interconnected detectors will switch their relays; only the detector sensing smoke will go into alarm, thus pinpointing the fire source.

An easy-access Test/Reset button makes it possible to test the unit with the cover on. Three DIP switches can be used to configure field selectable settings: cover tamper delay, number of sensors to be controlled, and shut down on trouble option. Each power board has two LED s that can be used to indicate the status of connected sensors, and a quick reference imprinted on the cover explains the LED status indications (Standby, Maintenance, Trouble, and Alarm). Can be customized to meet local codes and specifications without additional wiring.

Usage:

Units with a Unit Controller - Smoke detector sends a 24 VAC signal to the unit controller when smoke is sensed. Unit controller default mode will de-energize unit.

Units without a Unit Controller - Smoke detector interrupts the 24 VAC signal to the unit control circuit when smoke is sensed. Unit will be de-energized.
