SINGLE ZONE MINI-SPLIT HEAT PUMP

Job: _____

Location: _____

Schedule No.: _____

System Designation: _____

Engineer: _____

Architect: _____

Date: _____

For: ☐ Reference ☐ Approval ☐ Review ☐ Construction

GENERAL INFORMATION

- The system shall provide high heating capacity at -4°F (-20°C) with heating operation down to -13°F (-25°C).
- The outdoor unit shall have a base pan heater as standard for optimal defrost cycle water drainage.
- The system shall have a built-in Wi-Fi adapter as standard to allow control and monitoring using the Samsung SmartThings app.
- Outdoor unit shall provide 208/230V power to the indoor unit via 14 AWG X 3 interconnect power cable.
- Construction**
 - Outdoor unit: Galvanized steel with a baked-on powder-coated finish for durability.
 - The indoor unit chassis shall be UL94 V0 with a galvanized steel mounting bracket
 - All heat exchangers shall be mechanically bonded aluminum fin to copper tube.
- Refrigerant System**
 - The system shall utilize low-GWP R-32 refrigerant
 - Refrigerant flow shall be controlled by an electronic expansion valve at the outdoor unit
- Indoor Fan**
 - Three fan speed settings and auto settings
 - Automatic (motorized) vertical swing (up/down) louver
- Controls**
 - The indoor unit shall ship with a rechargeable, solar-cell wireless controller and holder. The wireless controller battery shall be charged with a USB C cable or the integral solar panel.
 - The included wireless controller shall have a pixel display that is visible in low light conditions.
 - The unit shall be operated via a wireless or wired remote control with DDC-type signal (wired controller sold separately)
 - Control wiring shall be 2 X 16 AWG.
 - Dual set temperature support when connected to supported controllers.
 - No additional interface modules/adapters are required when connecting to Samsung central control options.
- External Heat Control**
 - External heat control functionality allows for configuration of fan operation during auxiliary heat operation, defrost, and emergency heat (VSTAT10P-1 accessory required).
 - External heat control configuration settings include outside ambient external heat lockout, outside ambient compressor lockout, and time delay options (VSTAT10P-1 accessory required).
 - Emergency heat functionality allows the system to continue controlling the external heat source even when system errors prevent the heat pump from operating (VSTAT10P-1 accessory required).
 - External heat control functionality allows for configuration of fan operation during auxiliary heat operation, defrost, and emergency heat
 - Emergency heat functionality allows the system to continue controlling the external heat source even when system errors prevent the heat pump from operating
- Convenience**
 - 7-segment digital display on the front of the unit to display temperature and unit status
 - Washable main filter as standard accessible from the top of the unit
 - The outdoor unit shall have a snow accumulation prevention option setting to prevent snow drifting against an idle outdoor unit.
 - Night-time Quiet Mode: reduction of operational sound during evening hours (automatic or manual activation).
 - Emergency Temperature Output (ETO) function: when indoor unit is in error status or when room temperature exceeds a configurable temperature level, the system outputs a signal to an external source (e.g., backup system, building management system, alert device like status light, warning lamp, or buzzer).
 - The system can be configured as heating/cooling, cooling only, or heating only via outdoor unit option setting.
 - Maximum Current Control configurable from 50%100% via outdoor unit, wired controller, or central controls.

Indoor Unit: 3WMD036S6-1P

Outdoor Unit: 3WPD036S6S-1P
