

INTRODUCING STRATEGOS VARIABLE-SPEED HEAT PUMPS

NOW AVAILABLE TO ALL CUSTOMERS

ENGINEERED FOR PAYBACK. BUILT FOR PERFORMANCE.

We pushed the boundaries of electrification to deliver our most advanced ultra-high efficiency heat-pump rooftop unit yet.

Strategos Heat Pumps Deliver:

- Ultra-high efficiency powered by variable-speed technology
- Lowest total cost of ownership in its class
- Backward-compatible electricals to reduce upfront cost
- Advanced defrost algorithm that eliminates the blow of cold air

ELECTRIFICATION SIMPLIFIED

Retrofit-ready design with backward electrical compatibility and flexible heating options simplifies replacement projects while reducing upfront cost and installation complexity.

DESIGNED TO DELIVER

Variable-speed technology delivers built-in energy savings, qualifies for rebates and lowers total cost of ownership over the life of the system.

COMFORT WITHOUT COMPROMISE

Intelligent controls and advanced defrost technology precisely manage supply air temperature to deliver consistent comfort across a wide range of climate conditions.

BACKWARD-
COMPATIBLE
ELECTRICALS

70%

MORE EFFICIENT

Than Department of Energy's
minimum standards.

21.5

IEER

Ultra-high efficiency lowers
Total Cost of Ownership.

2x

MORE HEATING CAPACITY

Than traditional heat pumps
at 5°F/-15°C.
